

Internship Confirmation

Re: Internship Confirmation – Machine Learning Track, July 2026

To:
Institute of Technical Education and Research (ITER)
SIKSHA 'O' ANUSANDHAN (Deemed to be University)

To whom it may concern,

This letter confirms that **Debdatta Panda** has been accepted into the FlyRank AI Internship Program as a **Machine Learning Intern** for the July 2026 cohort.

Internship Details	
Intern Name	Debdatta Panda
Role / Title	Machine Learning Intern
Program	July 2026 – AI Internship
Start Date	July 1, 2026
End Date	Nov 18, 2026
Duration	Up to 300 hours *
Work Mode	Remote

** Interns will have access to all resources, assignments, capstones, and live events/sessions throughout the program. The 300-hour figure is an estimation of accumulated hours. The actual number of hours depends on the individual intern, their personal schedule, and pace of completion.*

Internship Content & Training Overview

The Machine Learning track is an 8-week structured program combining technical instruction, applied assignments, and live mentoring. It incorporates the full General AI Fluency track as a foundation, ensuring interns develop both conceptual understanding and practical ML skills.

General AI Fluency (Weeks 1–10, integrated)

The AI Fluency track runs concurrently and covers foundational AI skills applicable across all domains. Interns work through prompting fundamentals, workflow automation, tool evaluation, content generation with AI, portfolio building, and a final capstone project. Live events, AMA sessions with practitioners, and peer demos round out the experience.

Machine Learning Track (Weeks 1–8)

The ML track follows a project-based structure moving from data infrastructure through model evaluation, deployment, and a final case study. Weekly assignments and live sessions include:

- Weeks 1–2: Environment setup, corpus & data ingestion pipeline, and ML fundamentals
- Weeks 3–4: BigQuery to Feature Vector pipeline, eval specs, golden sets, and walking skeleton end-to-end builds
- Weeks 5–6: Automated eval harness with scoring & reporting, model fine-tuning (embed-and-classify), and a Modeling Lab (Baseline vs. ML)
- Weeks 6–7: Error analysis sprint, evaluation clinic, production hardening, cost engineering, and deployment with observability
- Week 8: ML impact capstone project, final case study & report, submission package, and ML Demo Day

Live cohort events, guest practitioner sessions, and peer review are embedded throughout the program.

Upon successful completion of the internship, FlyRank will provide an official evaluation report assessing the intern's performance, graded on a scale of **50 points**. This report can be submitted to the university or any relevant institution as documentation of the intern's work and achievement during the program.

Participation confirms acceptance into the internship program and does not create employment, contractor status, wages, benefits, or a job guarantee. Schools, universities, and employers verifying this confirmation can email verify@internship.flyrank.ai.

Sincerely,

A blue circular corporate seal for FlyRank Corp. The seal contains the text "FLYRANK CORP" at the top, "CORPORATE" below it, "SEAL" in the center, "5834" below the seal, and "CASP, WYOMING" at the bottom. A handwritten signature in black ink is written over the seal.

Alen Malkoc

Founder & CEO, FlyRank Corp.
